Challenges to Global Community Growth

By Irshad Mahmood – Director, Global Right Path

For any community to grow, they need to provide right education for their children, but it looks like Global World is moving towards Zero Child Policy which is totally Against Humanity and it is **Global Economic Terrorism to kill Humanity**. Look at how food prices are skyrocketing as well as educational costs. One might need to take photos of foods as souvenir for future due to possible disappearance of foods.

Every sincere parent wants their children to be like a super star, which needs right education. Many professional studies are extremely expensive and some are super most expensive specially for studying overseas, which many parents cannot afford even for one child. What if someone have clear hope to get approval of loan for overseas study from a bank, since they can afford tuition fee for the first year plus all other expenses, but at the last moment after one year bank refuses since they don't have their own home to show them only jobs. If they could have got clear answer earlier from the bank refusal a year ago then for sure they might not have sent their children at the first place.

Above is just one case but there are many students who are in extreme deep trouble even in Toronto (GTA), Canada who needs lots of help, but what about rest of the world. Many parents cannot afford even for their one child, which looks like we are living in **Global World which is moving towards Zero Child Policy which is totally Against Humanity**.

Global World needs an immediate Global Revolution for all Students to Get Interest Free Loan for their studies at least if they cannot provide absolutely Free Education. It is time now to open our eyes and correct Global System, in which all including Rich & Poor can live safe and sound and can educate their children.

Only True Love with Humanity can save Global World. We must join together to fight against Global Poverty and Global Famine. Plant Fruits and Vegetables etc. in your backyards, on the side of the streets, and parks etc. where ever it is possible and permissible by your governments. If you get more fruits and vegetables etc. than what you need, then share it with your neighbors, Friends and relatives and support following programs from the depth of your heart to fix Global system which is hurting all.

I have not seen a single business person doing very good business without any single customer (customers are human). **A single machine may replace thousands of humans BUT not a single human can ever replace a single machine**.

We invite you all for fixing Global System to save and serve humanity. Guidelines are in the following link
