Solution to Global Gridlocks

By Irshad Mahmood – Director, Global Right Path

One of the Greatest Inventions of all times is Wheel. With more and more inventions and more and more Super Sonic Fast Robotic Machines, Humans are becoming worthless and are being laid off. **A single machine may replace thousands of humans BUT not a single human can ever replace a single machine.** **Robotic World is Killing Humanity and Global Gridlocks are on the rise, since not taking guidance from the Quraan.**

Example of Global Gridlocks: Take an example of past time, when **1000** people were working in a farm land. Later they started using tractors and other machines, because of which layoff started happening and when comes superfast technology, more and more people were being off the jobs, perhaps they only need **10** people, then what those leftover **990** people will do and what education they need to get jobs. These **990** people were good customers to many businesses while on the job, and now they are not. Same way other businesses started using superfast technology and had laid off many employees, who were customers to many businesses as well, but not anymore. Although you are seeing other new technologies are coming into market, but later slowing down, since they calculated for total population and thinking that everyone has money tree in their backyards, but in reality they don't have, since they have lost their job. **Later industries started shutting down followed by banks and Governments as well and causing Global Gridlocks on the rise. When world is dependent on those who don't have money to pay their tuition fee, we need to change our world.**

Superfast Technology is exceptionally good for humanity **IF** those left over (laid off) employees are put onto new projects to support themselves and their families, which is only possible if we work Globally. **Students must have debt free education. Extreme Poverty is a breeding ground for Terrorist and Criminal Master Minds can use them.**

Another example of Global Gridlocks due to Soaring Food Prices:

Take an example of a farmer producing apples. To increase his income he need to sell more and more apples, for which he will need to increase its production no matter what. Also he will start using supersonic fast robotic machines and laying off humans, to increase his profitability. **A single supersonic fast robotic machine may replace thousands of human, but not a single human can ever replace a single supersonic fact machine,** and it is happening in every sector. Since layoff is on the rise, people will gradually reduce buying apples, which means, apple farmer will have to reduce production at later stage, and increase it price, to have enough savings, so more people will reduce buying apples in return and more prices will increase. You may find little bubbles of reduces price, like in the ocean you see bubbles. Eventually some farmers will have to shut down their apple industries, since they cannot manage any longer. You already have started seeing many businesses are shutting down.

Danger of Wiping Out Foods, Lifesaving Herbs & Medicines etc., Due to Global Gridlocks:

There is a great danger that some foods might be wiped out from the world due to not able to make it cost effective and people savings are falling behind due to Bad Global System, or No Global System exists to save humanity at the moment. Foods may be wiped out from the world due to Bad Global System and also Lifesaving Herbs & Lifesaving Medicines may be wiped out from the world due to Bad Global System.

Global World is facing Global Gridlocks and needs a Global Revolution:

It is not Wealth (Gold or Silver etc.) or Power which can save the Global World. Allah seized Qaroon, Pharaoh, and Hamaan and many more, for their crimes against humanity and nothing could save them, not even their wealth, power, or people, etc., (Ref: Al_Quraan_029:039). The World didn't end there, but it re-developed after a Great Revolution. Those who have never faced poverty may never understand its solution, unless they have really taken Guidance from the Quraan or have gone for intensive training. **It is 100% guaranteed to save the world and to help build our Heavenly Earth. If we truly apply the guidance given by the Quraan, we can re-develop the world through our own Great Global Revolution.** In simple terms **"NO CHANGES WITHOUT ACTIONS"**! It is time now to open our eyes and correct ourselves to serve the humanity in a revolutionized way in the light of Quraan, in which all including Rich & Poor can live safe and sound, since the Quraan gives the true revolutionized guidance to fix the Global System to save Humanity in a balanced way, (Ref: Al_Quraan_002:002). **Globally we can fix many things as mentioned in the following article.**
