

In the Name of Allah, Most Gracious, Most Merciful
Misuse of Antibiotics – May Kill Your Loved Ones

By Irshad Mahmood – Director, Siraat-al-Mustaqeem Dawah Centre

Search on the internet to check American, Canadian, or European Medical Journals before making any decisions. Thousands of Remedies are there for Thousands of diseases. Depending upon situation, Doctors need to decide and one must listen to his/her Family Doctor (Medical Practitioner), without bugging him/her, otherwise, he/she may say inside his/her heart, **NOT** directly to you “**go to hell**”. Below are key things to remember to save you and your loved ones life.

- 1> How severe are sicknesses?
- 2> How much is this urgency?
- 3> Can you avoid antibiotics?
- 4> Can you quit in the middle, without completing full course?
- 5> Can it be cure with Home Remedy or Herbal Remedy if there is not urgency?

You must avoid taking antibiotics as much as you can, **BUT** if you have to take it, **make sure to complete its full course (ten days)**, otherwise you will sure develop **antibiotic resistant bacteria**, which in turn might become **super bug**, and may kill you, since no medicine will work for you.

Here I would like to mention one simple case of severe pain and fever to understand. You should look first for the cause of the fever and take medication for that from your Family Doctor if it is not severe.

- 1> **Severe HIGH Fever:** Anytime above **104** degree Fahrenheit **40** degree centigrade.
MUST CALL 911 - EMERGENCY
- 2> **High Fever:** Anytime above **102** degree Fahrenheit **39** degree centigrade.
Below **104** degree Fahrenheit **40** degree centigrade.
MUST RUSH TO SEE DOCTOR
- 3> **Medium Fever:** Above **100** degree Fahrenheit **37.5** degree centigrade.
Below **102** degree Fahrenheit **39** degree centigrade.
Try over the counter medication, like Tylenol/Panadol
And other cough and cold medication etc.
Ask pharmacist to help you.
- 4> **Low Fever:** Below **100** degree Fahrenheit **37.5** degree centigrade.
Above **99** degree Fahrenheit **37** degree centigrade.
Try home remedy or other herbal remedy first.
Watch it for 24 to 48 hours, if not improving consult Doctor.

Side effects of antibiotics: Every medicine has some side effects, some are short term temporary, while others are long term temporary and in exceptional cases permanent and same is true for Antibiotics. For short term temporary side effects, you don't need to worry at all. For Long term temporary side effects, you will need to re-think **for a long** time, while for permanent side effects, you will need to re-think **millions** of times, and want to make sure if it is for life saving, like Chemotherapy or Radiation treatment etc. If it is for life saving, then you will sure need to go for it, even though it is very painful.

Confusion between side effects or due to disease: Here I would like to give an example, e.g. one gets some pimples on their back or face after taking antibiotics, make sure it is getting better or worse, if it is getting better, then no need to worry. You should worry, if it is getting worse, or painful, or itchy or very reddish etc. Keep in mind due to high fever ones may get this type of pimples, and as soon as fever goes down, you feel improvement, so in this case you should continue taking medications. **So keep monitoring while continue giving antibiotics and don't panic.** Also **for those symptoms which were before taking antibiotics, it may take at least two days before he/she feels improvements in many cases, so please be patient and don't panic, instead make Duaa to get recover from it.** Sometimes Doctors also prescribe anti-allergy etc. along with antibiotics to support recover softly.

Remember: Saving a life is like saving the whole world. Save yourself and your loved ones before it gets too late. (Ref. Al_Quraan_005.032)

YOU MUST AVOID ANTIBIOTICS, BUT IF YOU HAVE TO TAKE IT COMPLETE FULL COURSE (ten days)

Don't even think about playing with Antibiotics now otherwise it will play with you later, since no medicine will work for you and will give you a very hard time until you die.
