

In the Name of Allah, Most Gracious, Most Merciful

Tawaf at Kaaba in an Anticlockwise Direction

By Irshad Mahmood – Director, Siraat-al-Mustaqem Dawah Centre

Why is Tawaf at Kaaba Performed in an Anticlockwise Direction?

When we look at number **6** from one side it is **6** for sure, BUT when we look same **6** from other side it is number **9**. For many of our issues we only look from one aspect while forgetting other aspects at all and don't have any tolerance/courage to listen others.

Most **left-handed** people prefer to draw circles **clockwise** and circulate in buildings clockwise, and most **right-handed** people prefer to draw circles **anticlockwise** and circulate in buildings anticlockwise. This is believed to result from dominant brain hemispheres, though some attribute it to muscle mechanics.

Cyclones spins **clockwise** in the **southern** hemisphere and **counterclockwise** in the **northern** hemisphere. Kaaba is little north of hemisphere and its circuits is according to wind direction in northern hemisphere.

Rotation can occur in two possible directions. A clockwise (typically abbreviated as CW) motion is one that proceeds in the same direction as a clock's hands: from the top to the right, then down and then to the left, and back up to the top. The opposite sense of rotation or revolution is (in Commonwealth English) anticlockwise (ACW), or (in North American English) counterclockwise (CCW). In a mathematical sense, a circle defined parametrically in a positive Cartesian plane by the equations $x = \cos t$ and $y = \sin t$ is traced anticlockwise as t increases in value.

Sometimes the opposite (left-handed, anticlockwise, reverse) sense of threading is used for a special reason. A thread might need to be left-handed to prevent operational stresses from loosening it. For example, some older cars and trucks had right-handed lug nuts on the right wheels and left-handed ones on the left wheels, so that, as the vehicle moved forward, the lug nuts tended to tighten rather than loosen. For bicycle pedals, the one on the left must be reverse-threaded to prevent it unscrewing during use. Similarly, the flywheel of a spinning wheel uses a left-hand thread to keep it from loosening. A turnbuckle has right-handed threads on one end and left-handed threads on the other. Some gas fittings are left-handed to prevent disastrous misconnections: oxygen fittings are right-handed, but acetylene, propane, and other flammable gases are unmistakably distinguished by left-handed fittings.

We are wasting our energy in many unnecessary things instead of constructive working. Saving a life is the most important thing at all the time, which includes fixing Global Economy in the beginning of 21st century. We must start writing/forwarding/discussing Global Articles to fix Global Economy which is hurting all humanity, instead of wasting our time to save humanity, since it is the building block and is like a foundation for our future and our children.

REMEMBER: Just because you are right, does not mean I am wrong. You just haven't seen life from my side.

To Establish True **Deen-e-Ibrahim** we need Good & Effective **Team Planning**.

Non-Practicing Muslims are like ASS / Donkey carrying books, (Ref: Al_Quraan_062.005).

None argue concerning the revelations (Ayaat) of Allah but those who disbelieve ..., (Ref: Al_Quraan_040.004).

Hypocrites Read the Quraan BUT Practices Something Else.

There will be NO CHANGES WITHOUT ACTIONS, (Ref: Al_Quraan_013.011).

Read Al-Quraan, the Miracle of Miracles and free from contradictions and errors
