

Doctor Kalonji (Black Seeds)

Prophet Muhammad (PBUH) delivered complete message (the Quraan), and didn't hide any single message. He was **NOT** a Physician or Medical Doctor, rather **super expert of the Quraan** which is not a book of Medicine or science although it has few facts about medicines and science etc., rather it is the **Book of Guidance for Humanity** to educate People to save themselves from Hellfire. Nowadays there are many diseases including cancerous diseases which must **NOT** be treated with Kalonji (Black Seeds). People are inclined to modern medical treatments to save themselves & their loved ones, since saving a life is like save whole world. If someone is sick, he/she must consult Doctors and make sure to have second and third opinions for complex cases, to make sure Doctors are not fooling them to earn more money. Life is only one time and one has to take special care of it. **Don't** behave like **Doctor Kalongi** of **21st** Century, rather Love yourself and your loved ones and **don't treat all diseases with Kalonji (Black Seeds)** rather go for modern treatments where needed, which could be new type of medicines, radiations, surgery, chemotherapy, stem cells, or bone marrow etc. **TEMPORARY** Side effects from all medicines are norm. **Mothers** need to have enough knowledge about medicines etc. to save their children.
