

# Rebuilding Kaabah for 21st Century and Beyond

Kaabah was first built by Prophet Ibrahim (pbuh) and Prophet Ismael (pbuh) and has been rebuilt multiple times later. It is time now to rebuild it for 21<sup>st</sup> Century and beyond.

**Restructuring and Rebuilding:** Allah has commanded Prophet Ibrahim (pbuh) and Prophet Ismael (pbuh) build Kaabah and to keep it clean/purify, (Ref: Al\_Quraan\_002.125). We MUST keep it clean and purify including removing any physical or spiritual obstacles in it. Over 3 million pilgrims used to perform Hajj every year which might increase to 5 million or more in near future. Also Corona lock down gave us to think differently, where Imam Kaabah was leading prayers from far behind and people were stopped from touching Kaabah as well as Hajar al Aswad. We need to make sure to use extra long lasting materials to rebuild.

**Suggestions to Saudi Government and Scholars around the globe:** 1> Move Hateem and Muqame Ebrahim far out of the main space which is reserved for Salaah / Prayers and Tawaaf, since it is physical obstacle during Hajj and also during Umrah in Ramadaan when there are huge crowd. 2> Put a circular barrier around Kaabah to protect people from touching Kaabah or touching Hajar al Aswad. 3> Front space closed to Kaaba need to be reserved for Tawaaf. 4> Do not allow anyone who had already performed Hajj unless taking Mahram women with them or are main organizers of legal certified Hajj team. Let us have big heart and leave some space for those Muslims who have not yet performed Hajj.
