

# World Languages Disappearing

As per the general consensus there are between 6,000 and 7,000 languages currently spoken in the beginning of 21<sup>st</sup> century and that between 50% and 90% of them will have become extinct by the end of year 2100. Chinese have moved from many different complex Chinese to one simplified Chinese (Mandarin). Language shift most commonly occurs when speakers switch to a language associated with social or economic power or spoken more widely, the ultimate result being language death.

Allah has protected the Quraan in Arabic Language and so Arabic will always be there till the Day of Judgment. Muslim Nations must switch to Arabic Language if their Mother Tongue and National Language is not Arabic. Additionally they must teach their citizens International Language which is English at present time, BUT if International Language is switched to some other Language, then they also need to switch to that as well.

No Nation can survive without upgrading themselves according to time which includes Languages. Follow us on Twitter @GlobalRightPath
