

Invention Of PAPER and CLOTH

Human Recording of History of Paper or Cloths estimates could be wrong.

Allah has sent down clothing to cover, (Ref. Al_Quraan _007.026), and as per human estimate it could be 500,000 years ago, so what about paper.

One of Prophet Suleman's follower had super fast technology to bring the stage of of queen in blink of eye, (Ref. Al_Quraan_027.015-044), so what about paper.

Invention of Paper was also very long, Allah has revealed many books on paper before the Quraan. As per Jewish believe ten commandments came on stone BUT later whole book the Torah came on paper in 15th century BC and it was roleable.

All the Hadeeth Writers were from ancianet Persian Empire. Fatimid Caliphate ruled large Muslim Populations from 909 - 1171 and spread Hearsay from Al-Azhar University in Cairo in Egypt to Deviate Ummah from the Quraan. Al_Bukhari collected nearly 600,000 narrations, while he recorded only 7397, by rejecting vast majority of Hadeeth by keeping around 1% of Hadeeth. In worldly matters we reject completely if any of the products fails tests in such a high percentages.
