

Tips to Increase Mobile's Battery Life

Many Mobiles Batteries might discharge quickly even when it is new due to many Apps running unnecessarily in the background, which you only want to run when you need it except System Applications and Google Applications on **Android** version **9**. For other versions or mobile check the manual or search on internet.

Tap on **Settings** on **Android** version **9**

Tap on **Apps & notifications**

Tap on **See all ... apps**

Tap on the **app** (e.g. **Bus/Train Tracker** or **Weather** etc.) for stopping from running in the background **EXCEPT** Default System Applications, Skype and WhatsApp etc.

Tap on **Advanced**

Tap on **Battery**

Tap on **Background restriction**

Tap on **RESTRICT**
